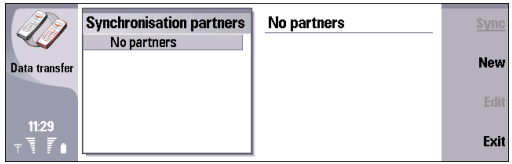
Transferring data to your Nokia 9300

Select **Desk**→ **Tools**→ **Data transfer**.



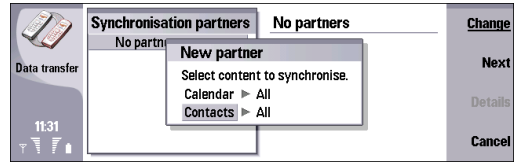
If you have a device that supports data synchronisation, you can use Data transfer to synchronize your contacts and calendar with your Nokia 9300. Supported devices are currently Nokia 6820, Nokia 6230, and Nokia 9500 Communicator. For more information on compatible devices, contact your dealer, operator, or service provider.

Using a Bluetooth or infrared connection, you can synchronize your calendar and contact entries between the two devices. You can choose to transfer all of the data, or define the categories of data that you wish to move.

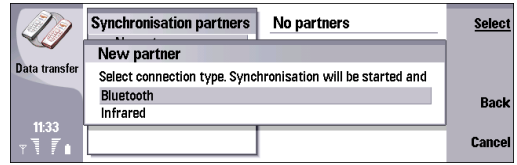
Because device models are designed differently, there may be differences in the way they handle data transfer. For example, your Nokia 9300 allows you to enter a great deal of contact information for each contact. Another device model may only allow a few details per contact. If you synchronize contact information between these two devices, some of the data may be transferred to an incorrect field, and some data may not be transferred at all.

To transfer data to your Nokia 9300:

1 Press **New** to create a new synchronization profile.
2 Select the content you want to synchronize (*Calendar* and *Contacts*), and press **Next**.



3 Select the connection type (*Bluetooth* or *Infrared*), and press **Select**.



4 If you selected *Infrared*, press **Select**.
If you selected *Bluetooth*, a window listing available devices with Bluetooth technology is shown. Press **Search** to search for the device with which you want to synchronize. To stop the search, press **Stop**. Select the

Copyright © 2005 Nokia. All rights reserved.

device with which you want to synchronize, and press **Select**.

5 After the infrared or Bluetooth connection between the two devices has been established, a dialog opens, displaying the status of the whole transfer process. To view information on the synchronization, press **Menu**, and select *File*→ *Synchronisation log*.

Depending upon the selected options, the transfer can take a long time. Make sure that both of the devices are charged or that they are connected to their chargers during the transfer time. You can cancel the transfer process at any stage when the *Cancel* command button is available.

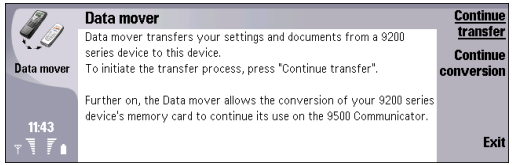
Transferring data from Nokia 9200 series Communicators

Select **Desk**→ **Tools**→ **Data mover**.



Data mover
Data mover transfers your settings and documents from a 9200 series device to this device.
To initiate the transfer process, press "Continue transfer".
Further on, the Data mover allows the conversion of your 9200 series device's memory card to continue its use on the 9500 Communicator.
Continue transfer

You can use *Data mover* to transfer data, such as contacts and settings, from your Nokia 9200 series Communicator to your Nokia 9300 with infrared or a compatible memory card.

Note: Before you use an existing compatible memory card with your Nokia 9300, you must convert the memory card with *Data mover* and reinstall the applications that you previously installed to the memory card. However, do not reinstall any pre-installed applications for the Nokia 9210 Communicator. Your Nokia 9300 contains a later version of these applications, and these later versions must be used with Nokia 9300.

Before you start, make sure that there is enough free memory on your devices or memory card for the transfer.

The amount of required free memory depends on the data you are transferring. If you have a compatible memory card, insert it into your Nokia 9200 series Communicator even if you are going to use infrared as the means of transfer. *Data mover* can then use the memory card as a temporary storage. Using a memory card also makes the transfer process faster.

Do not use the Nokia 9300 when using *Data mover*. If possible, switch off the cover phone, and make sure that the battery is not discharged.

There may be additional steps, depending on the type of information you want to transfer, the method of transfer you want to use, the amount of free memory on your previous device or memory card, or the number of successful or unsuccessful transfers you have made previously. Read the instructions on the device screen carefully. The instructions guide you through the process and include information not covered in this guide.

To transfer data from a Nokia 9200 series Communicator:

1 In the *Data mover* startup screen, press **Continue transfer**. If the data is on a memory card, insert it into your Nokia 9200 series Communicator.

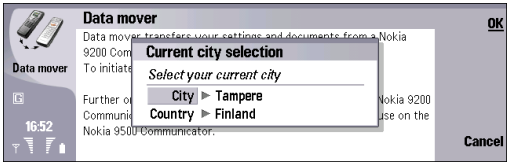
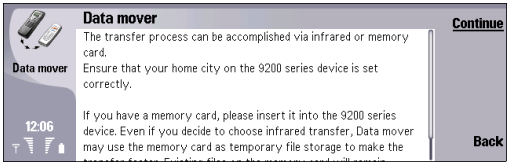
2 Choose your current city and country and press **OK**.



3 Activate infrared in both devices, make sure that the infrared ports of the devices are facing each other, and press **Continue**. An infrared connection is established between the devices.



Data mover
Continue
The transfer process can be accomplished via infrared or memory card.
Ensure that your home city on the 9200 series device is set correctly.
If you have a memory card, please insert it into the 9200 series device. Even if you decide to choose infrared transfer, Data mover may use the memory card as temporary file storage to make the

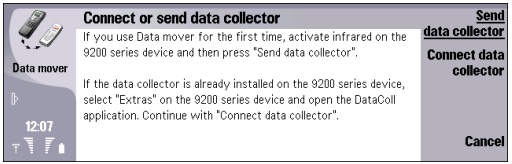
4 Press **Send data collector** to send Data collector to your Nokia 9200 series Communicator. Data collector is used to collect data from your Nokia 9200 series Communicator. You only need to send Data collector once; if you use *Data mover* later, you do not have to send Data collector again. Data collector is sent to your Nokia 9200 series Communicator as an infrared message.

If Data collector is already installed, proceed to step 6.



Data mover
Connect or send data collector
If you use Data mover for the first time, activate infrared on the 9200 series device and then press "Send data collector".
If the data collector is already installed on the 9200 series device, select "Extras" on the 9200 series device and open the DataColl application. Continue with "Connect data collector".
Send data collector
Connect data collector

Cancel

5 To install Data collector:
- On your Nokia 9200 series Communicator, select the infrared message containing Data collector (DataColl.SIS), and press **Open**. If the **Open** option is not available, press **Save**, and open the file from the location in which you saved it.
- When asked for confirmation, press **OK**.
- Select a location for Data collector, and press **Select**.
- When the installation is complete, press **OK**.

Proceed to step 7.

6 If Data collector is already installed on your Nokia 9200 series Communicator, select **Extras**→ **Data collector** and press **Open**.

7 On your Nokia 9300, press **Connect data coll.**.

8 Select the data you want to transfer from your Nokia 9200 series Communicator. You can transfer calendar and contact information, messages, settings, documents, and images. Some files, such as business

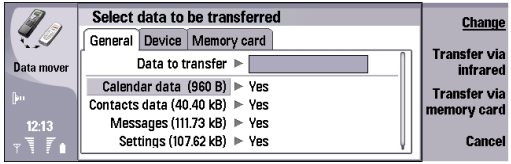
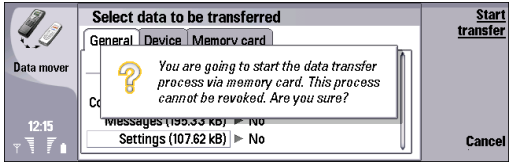
cards and e-mail messages not stored in the *Inbox*, are not transferred.



9 Press **Transfer infrared** or **Transfer mem. card**.

10 Press **Start transfer**.

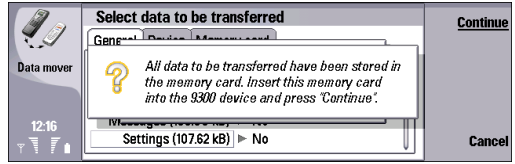
11 When asked for confirmation, press **Start transfer**. The transfer may take a long time.



If the transfer process is interrupted, restart *Data mover*, and continue the transfer. If this does not help, there may be a problem with the data you are trying to transfer. Start the data moving process from the beginning, but do not select to transfer the data that seems to be causing the problem.

12 If you are using a memory card as the means of transfer, remove the memory card from your Nokia 9200 series Communicator, insert it into your Nokia 9300, and press **Continue**.

If you are using infrared, proceed to step 11.



Select data to be transferred
All data to be transferred have been stored in the memory card. Insert this memory card into the 9300 device and press "Continue".

12:16

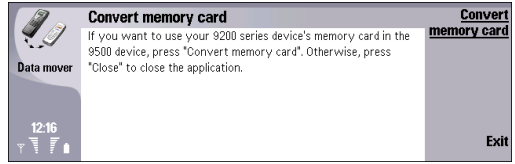
14 Press **Exit** to exit or **Convert mem. card** to convert a memory card for use in your Nokia 9300. If you only used the memory card as the means of transfer, you do not need to convert it. To use the contact and calendar information stored on the memory card, you must convert your memory card for use in your Nokia 9300.



Convert memory card
If you want to use your 9200 series device's memory card in the 9500 device, press "Convert memory card". Otherwise, press "Close" to close the application.

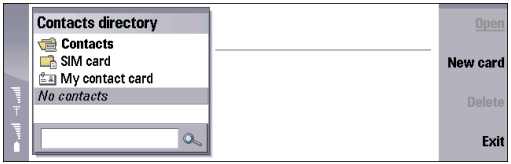
Transferring telephone numbers using a SIM card

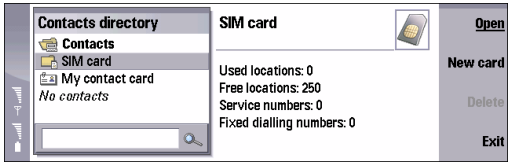
Press **Contacts**.



You can copy all or some of the phone number on a GSM phone to your Nokia 9300. Duplicate contacts will be created if the same contact already exists on your Nokia 9300. These duplicate contact cards can be deleted manually afterwards.

To copy telephone numbers using a SIM card:

1. Copy the numbers you wish to move from another GSM phone to the SIM card, and follow the instructions provided in the user guide of the phone.
2. Move the SIM card to the Nokia 9300.
3. On the Nokia 9300, press **Contacts**.
4. Select *SIM card*, and press **Open**.



5. Select the contacts you want to copy by using standard selection methods. For example, press and hold the **Shift** key, and use the scroll key to select multiple contacts.
   To copy all the contacts from your SIM card to the Nokia 9300 contacts database, press **Ctrl+a** (select all), and then press **Ctrl+c** (copy).
6. Press **Menu**, and select *File*→ *More options*→ *Copy to...*.
